WATER DISPENSER

MARS Aqua 360 Water Dispenser is our salt buster product which can be used on water with TDS between 250-1250 ppm. It converts salty water to fresh drinking water added with UV technology to ensure the complete microbiological disinfection.

WATER DISPENSER

SALIENT FEATURES

- Highly efficient tubular UV design
- Pre-warning indication helps to know that the pre-filter is to be changed
- Sensors – to monitor the performance of the UV & ozone
- Quartz Sleeve – to maximize the purification efficiency
- Built in timer to monitor the life time of the UV Lamp
- Dump – to empty the tanks if the machine is kept idle for about 72 hours
- Added minerals
- Alkaline water which is good for health

SPECIFICATIONS

- Micron candle filter(5 micron) – for sediment removal
- Pre carbon filter – for eliminating the odor, color and organics
- Anti-scalent – for membrane protection
- RO membrane – for TDS reduction
- Post carbon filter – for polishing the permeate water
- UV – to ensure complete micro-biological disinfection

APPLICATIONS
